Section 2 - Only for members of local bat groups

Q8 How involved are you in your local bat group(s)? Select the closest matching description. If different by bat group, answer for the one most involved in.

	All		BCT		BG		Rest	
Heavily	0		166	48.7%	220	41.2%	0

No answer	0		5		10		0	
Total	0		346		544		0	

Heavily - attend most/all meetings and events
 Partially - attend some of the meetings and events
 Not a lot - attend few, if any, meetings and events

NB. For the questions requesting responses under two headings (Q9 in this section and Q21 in Section 4) it appears from the pattern of responses that some respondents answered under only one of the headings ('current' or 'expected' in Q9). Although leaving a box unchecked in Q9 was a valid response (indicating 'Don't know' or 'Disagree') they have regrettably had to be classified as 'No answer' where appropriate and this is reflected in the following tables for Q9. What these tables include are all those who clearly provided an answer under one or both headings. As a check, a separate analysis based on those respondents who clearly provided answers under both headings has been conducted. There is no significant difference in the results. This analysis appears in the Appendix along with a more detailed analysis of the responses.

NB. For the questions requesting responses under two headings (Q21 in this section and Q9 in Section 2) it appears from the pattern of responses that some respondents answered under only one of the headings ('currently' or 'should' in Q21). Although leaving a box unchecked in Q21 was a valid response (indicating 'Don't know' or 'Disagree') they have regrettably had to be classified as 'No answer' where appropriate and this is reflected in the following tables for Q21. What these tables include are all those who clearly provided an answer under one or both headings. As a check, a separate analysis based on those respondents who clearly provided answers under both headings has been conducted. There is no significant difference in the results. This analysis appears in the Appendix along with a more detailed analysis of the responses.

NB. It is clear that some respondents omitted to select the 'Yes' option but had issues they believe needed to be addressed by a review. The following tables therefore include these respondents regardless of how they answered Q23a.

Q23b Number of text boxes containing issues that respondents believe need to be addressed by a review

NB. Some text boxes contained more than one issue, the total number of issues being 602 (this is before deduplication, repeated issues therefore counted on each occasion mentioned).

In addition to the above, a further 5 'outcome' text boxes were completed but with no 'issue' associated with them. These are included in the following tables.

Q23b Number of issues/outcomes entered that respondents believe need to be addressed by a review AND they must be done BUT no deduplication of issues (repeated issues therefore counted on each occasion mentioned)
